Contents

Preface: Proceedings of the 20th International Seminar on Surface Physics
M. Stęślicka, R. Kucharczyk and R. Błaszczyszyn 2

Opening session

Word of welcome
M. Stęślicka 3

Opening address
J.J. Ziółkowski 5

Reflections from a surfacist
S.G. Davison 7

Surface physics at the Millennium's threshold

Wrocaw Seminars' Silver Anniversary
A.G. Naumovets and S.G. Davison 9

The next 25 years of surface physics
E.W. Plummer, Ismail, R. Matzdorf, A.V. Melechko and J. Zhang 17

Atomic structure and topography

Equilibrium crystal shapes: towards absolute energies
H.P. Bonzel 45

Morphological aspects of sulfate-induced reconstruction of Cu(111) in sulfuric acid solution: in situ STM study
P. Broekmann, M. Wilms, A. Spaenig and K. Wandelt 59

Self-assembled parallel mesoscopic Pb-wires on Au-modified Si(533) substrates
M. Jałochowski and E. Bauer 79

Experiments on individual alumina-supported adatoms and clusters
N. Nilius, A. Cörper, G. Bozdech, N. Ernst and H.-J. Freund 99

Nano-scale modification of ionic surfaces induced by electronic transitions
M. Szymonski, J. Kolodziej, B. Such, P. Piatkowski, P. Struski, P. Czuba and F. Krok 123

Atoms and molecules at surfaces

Bivalent ability for charge transfer in process of hydrogen interaction with surfaces of transition metals
R. Duś and E. Nowicka 139

Simple master equation for the description of charge transfer in atom–surface scattering
C.M. Dutta and P. Nordlander 155

XPS and TDS study of CO interaction with Pd–AlOx systems
V. Matolín, I. Stará, N. Tsud and V. Johánek 167

Effects and structures of the O/Cu surfactant layer in O-mediated film growth of Cu on Ru(0001)
K. Meinel, Ch. Ammer, M. Mitte, H. Wolter and H. Neddermeyer 183

Reactions on alkali-modified low-index stepped copper surfaces
J. Onsgaard, L. Bech, C. Svensgaard, P.J. Godowski and S.V. Hoffmann 205

Modeling nanoscopic formations of C_{60} on supporting substrates
H. Rafii-Tabar and K. Ghafoori-Tabrizi 217

Mechanisms of surface diffusion
T.T. Tsong 235

Electronic properties

Influence of the substrate electronic structure on metallic quantum well state dispersions in ultrathin metal films
A. Danese, D.A. Arena and R.A. Bartynski 249

Surface states in electrochemisorption
S.G. Davison, K.W. Sulston, Z.L. Miskovic and F.O. Goodman 259

Surface-state electron dynamics in noble metals
P.M. Echenique, J. Osma, M. Machado, V.M. Silkin, E.V. Chulkov and J.M. Pitarke 271

Metallic slabs: perturbative treatments based on jellium
C. Fiolhais, C. Henriques, I. Sarría and J.M. Pitarke 285

Electron correlation effects at Sn/Si(111)–$3 \times 3, \sqrt{3} \times \sqrt{3}$ and Sn/Ge(111)–$3 \times 3, \sqrt{3} \times \sqrt{3}$ reconstructions
F. Flores, J. Ortega, R. Pérez, A. Charrier, F. Thibaudau, J.-M. Debever and J.-M. Themlin 299

Surface states and resonances in field emission from low-index facets of clean tungsten
Z.A. Ibrahim and M.J.G. Lee 309

Clean and doped surface electronic structure in angle-resolved and resonant photoemission study
B.A. Orlowski, B.J. Kowalski, E. Guziewicz, K. Szamota-Sadowska, N. Barrett, C. Guillot, R.L. Johnson and J. Ghijsen 323

Photofield emission spectroscopy and surface density of states
T. Radoń 339

Other topics

Photonic tunneling between two wires
L. Dobrzynski, B. Djafari-Rouhani, A. Akjouj, J.O. Vasseur and J. Zemmouri 347

Surface and interface effects in the growth of giant magnetoresistance spin valves for ultrahigh-density data-storage applications
W.F. Egelhoff Jr., P.J. Chen, C.J. Powell and R.D. McMichael, M.D. Stiles 355

Interfacial energy: bicrystals of semi-infinite crystals
J.H. van der Merwe 365

Elastic waves in quasiperiodic structures
V.R. Velasco and J.E. Zárate 383

Contents of the 'Vacuum' issue 403
